

**Schedule of scientific seminars of
Department of Environmental Engineering
2016-2017 academic year**

№	Topic	Artists	Deadline (Term of Execution)
1	Prediction of stress-strain state of soil in landfills	Osipova T. A. Remez N. S.	October 2016
2	Prediction release of landfill gas from the landfill as part of the environmental policy of Ukraine	Shmarin S. Remez N. S.	October 2016
3	Developing effective seismic safe construction and borehole charges in the quarries of explosions in karst massif	Zhukova N. I. Boyko V. V.	November 2016
4	Optimization of the rock mass excavation in quarries based dynamic resistance digging	Yevtyeyeva L. I. Kryuchkov A. I.	December 2016
5	Increasing environmental safety of use and storage of fuel oil by physicochemical regulation	Kofanov O. E. Remez N. S.	February 2017
6	Development of a method methanogenesis productivity during the anaerobic treatment of biomass	Opolinskyy I. O. Dychko A. O.	March 2017
7	Development of rapid methods for monitoring environmental parameters under the influence of transport streams	Borisov O. Kofanov O. V.	April 2017
